

Table XLVII. Mangaldan DRRM-H Action Plan 2025

MANGALDAN DISASTER RISK REDUCTION AND MANAGEMENT IN HEALTH PLAN 2025

<p><b>Rationale</b>                  Community health is continuously threatened worldwide. Over the past decades, emergencies and disaster significantly affect the entirety of a community causing vast disruptions and reductions in healthcare system. Yearly, there are paucity of evidences on the safety and efficacy of individual and community-level strategies to improve disaster risk reduction and management program and its relation to health. These destructive events should not be the reason for us to be shaken, rather they must stand as means for us to stay stronger.                  Disaster Risk Reduction Management in Health is an intricate process and evidence-based system carefully strategized to evaluate the hazard, vulnerabilities and risks that may occur in a community. Micro and macro plans are created to play integral role in respond to all the emerging disasters in our community. These emergency and contingency are ways for us to manage this unwarranted situation.</p>
